

Walki[®]Base

Siliconizing, Tapes and Labelling

walki

Walki Materials for Siliconizing, Tapes and Labelling

Walki's knowledge and long experience in extrusion coating is a strength when manufacturing base material for siliconizing, tapes and labelling.

Walki@Single Base is one side PE/PP coated strong kraft paper available in grammages 70–130 g/m² or other on request.

Walki@Double Base is double side PE/PP coated strong kraft paper available in grammages 90–150 g/m² or other on request.

Within **Technical Papers** there is a wide range of products for technical applications. Properties and functions are very specific for each end use. Paper is used as a main base material to meet all different requirements. Also other web based materials can be used.

Walki in brief

Walki produces wrappings for the paper and metal industries, food and consumer packaging materials, decorative and functional laminates, barrier liners for solid and corrugated packaging, facings for the insulation and construction industries and solutions for technical applications.

Walki's production units in Finland, Germany, the U.K., China and Sweden have a combined annual production capacity of 300,000 tonnes, an annual net sales total of 300 million euros and a workforce of 900 employees.

Walki consists of three business areas

PAPER PACKAGING

Reel packaging

Ream wrapping

CONSUMER BOARD

Barrier board

Barrier lining

TECHNICAL PRODUCTS

Flexible packaging

Heavy duty wrapping

Insulation and construction facing materials

Technical industrial papers
