

Walki® Met

Quality packaging for metals

walki

Walki®Met – valuable metals undamaged to their destination

Packaging must protect metal coils and sheets throughout the transportation chain. Condensed water formed during storage and transportation may cause corrosion that is harmful to a valuable product. This is a major problem especially during sea transportation. The paper-based Walki®Met products protect metals by absorbing moisture.

Effective protection for metals

- Storage and transport conditions can be variable. Walki®Met
- protects products from external moisture and condensation,
 - protects products from air impurities, such as sulphur compounds,
 - can be delivered with effective anticorrosion treatment depending on the metal to be packaged,
 - usually makes oiling unnecessary,
 - gives good mechanical protection,
 - is easy to handle during packaging.

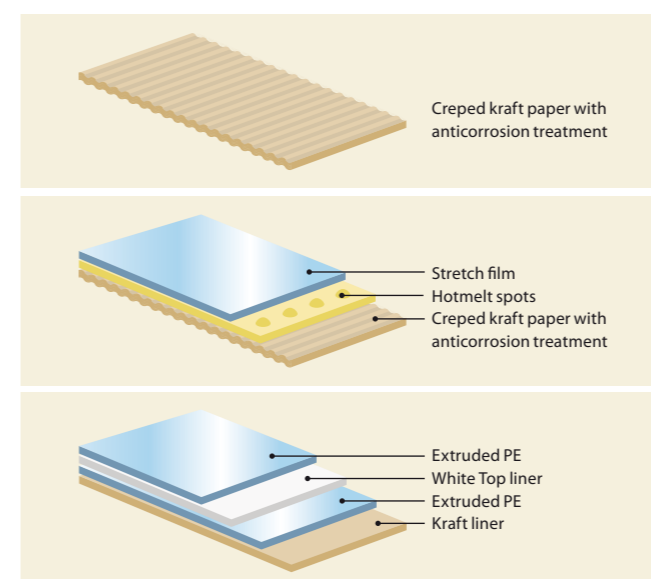

Quality dressed in quality

- Packaging is an important part of marketing and a way for companies to boost their image. Walki®Met
- stands out from the rest,
 - can also be delivered with print.

Environmentally friendly

- The bulk of the packaging consists of renewable raw materials.
- The package can be recycled as energy.
- Walki's plants in Finland have certified environmental systems (ISO 14001).

Basic structures and uses

Walki®Met 20 (e.g. Walki®Met 20 V 82 g/m²)

- Spare part packaging when moisture protection is not required.
- Coil packaging on Pesmel's automatic "through-the-eye" wrapping line using a separate stretch film.

Walki®Met 25 (e.g. Walki®Met 25 V/R 145 g/m²)

- Coil packaging
- Sheet packaging
- Wire and band packaging with spiral packaging machines
- Spare part packaging when moisture protection is required

Walki®Met 30 (e.g. Walki®Met 30 A 627 g/m²)

- Strong laminate for coil packaging (casing and socket material)
- Strong laminate for sheet packaging

Other qualities can be tailored to individual customer needs.

Walki in brief

Walki produces wrappings for the paper and metal industries, food and consumer packaging materials, decorative and functional laminates, barrier liners for solid and corrugated packaging, facings for the insulation and construction industries and solutions for technical applications.

Walki's production units in Finland, Sweden, Germany, Poland, the UK and China have annual net sales of about 300 million Euros and a workforce of approximately 1,000 employees.
