

# Walki®EasySeal Mono

## Thermoformable recyclable skin for superior car carpet adhesion

---

Introducing Walki®EasySeal Mono: an advanced, thermoformable automotive skin ensuring robust adhesion among car carpet components, acting as versatile barriers with multifunctional capabilities. This mono-material solution securely bonds elements while efficiently blocking moisture and gas. Crafted entirely from polyester, Walki®EasySeal Mono embodies environmental responsibility, ensuring recyclability, especially with PET non-wovens—marking a significant leap towards sustainable automotive materials, delivering both performance and ecological consciousness.

### Walki®EasySeal Mono attributes

- Designed for recycling
- Potential for faster production
- Delivers moisture, gas and acoustic barrier
- High-temperature resistance
- Improves chemical and mechanical adhesion

### Typical applications

- Carpet backing skin

**Working with us makes you more competitive.**  
**More functionalities, less layers and steps.**

---

- Combination of innovative functionalities
- Material combinations with synergies
- Easy handling
- Faster production
- Lower stock levels
- Simpler warehousing
