

Walki® Line

Decorative laminates

walki

Walki and Decorative laminates

Walki®Line material can be part of a decorative laminate or tool in the manufacturing process. The polymer coated web based material is carefully chosen for each application.

Walki®Floor Line is PE coated web material for flooring laminates giving moisture protection and sound insulation to the flooring.

Walki®Table Line is PE coated and printed (by request) strong kraft paper for lamination to the back side of the worktop. It gives good moisture stability to the board material (chip board, HDF, MDF, etc).

Walki®Cover Line is a special laminate used as padding material for pressing processes. It has good release properties and protects the product surface in the pressing process. Cover Line can be re-used several times.

Standard products available:

WALKI®Floor Line

WALKI®Table Line

Within **Technical Papers** there is a wide range of products for technical applications. Properties and functions are very specific for each end use. Paper is used as a main base material to meet all different requirements. Also other web based materials can be used.

Walki in brief

Walki produces wrappings for the paper and metal industries, food and consumer packaging materials, decorative and functional laminates, barrier liners for solid and corrugated packaging, facings for the insulation and construction industries and solutions for technical applications.

Walki's production units in Finland, Germany, the U.K., China and Sweden have a combined annual production capacity of 300,000 tonnes, an annual net sales total of 300 million euros and a workforce of 900 employees.
